

BADGE MODIFICATION SERVICE

Effective through December 31, 2023

Modifying your Badge:

Occasionally our customers express a need to modify their badge i.e.; change the seal, add a panel, or perhaps change the badge finish. Because we understand the meaning your badge holds we do our best to accommodate you. We've tried to keep our prices competitive but due to the intricate make up of a badge and the reverse manufacturing that goes into modifying a finished badge in some instances you may find it much more economical to purchase a new badge.

Risk: All modifications are done at the owner's risk. All requests for modifications are subject to inspection and acceptance at the factory. We reserve the right to refuse your badge modification if we feel the badge will not be restored to suitable condition for reuse.

Limitations: We can only change lettering color when regular enamel is used, all other enamel types cannot be changed.

The following cannot be performed:

- Change or add lettering on a badge.
- Change applied figures at bottom or center of badge (i.e.; B615, B617, B315, B589 etc)
- Change a shell back badge to a solid badge or vice versa
- Change shape or dap of badge
- Change a panel on a badge – this is new as of 1/1/13 – **we no longer will change a panel on a badge.**
- Change letters or remove periods on cut out letters
- Change regular enamel to hard enamel
- Change a plated badge to a Hi-Glo®, Rho-Glo®, Gol-Tone®, or Sil-Tone® finish
- Change or repair badge cases
- Make modifications to a badge manufactured by someone other than Blackinton®

Process your Modification:

1. Fill out the below badge modification form and return it with your shipment.
2. Mail your badge to the following address:
 - a. V.H. Blackinton & Co., Inc., Attn: Repair Dept. 221 John L. Dietsch Blvd. Attleboro Falls, MA 02763

(cut here and return below with your returned product)
